

Stormwater Program Management and Compliance

Stormwater carries *untreated* water runoff directly into creeks and rivers and, by doing so, impacts our environment. Stormwater becomes a concern when precipitation runoff picks up debris, chemicals, dirt, and other pollutants as it flows across the ground, streets, and parking lots. It also is a concern when it causes flooding and erosion of stream banks. Improper disposal of wastes, such as oil, paint, fertilizer and pesticides will pollute the stormwater and destroy plants, endanger wildlife and affect drinking water.

St Vrain Valley School District is committed to our environment and will strive to be good stewards of the land within our jurisdiction and to use appropriate Best Management Practices (BMPs) to contribute to the improvement of water quality.

St Vrain Valley School District encourages all staff, students, and community members to get involved with the opportunities provided by the local groups including the Keep It Clean Partnership of communities located along the Front Range dedicated to protecting the water quality and reducing stormwater pollution. More information on this group can be found at www.keepitcleanpartnership.org

St Vrain Valley School District has developed and implemented a “Stormwater Management Program Plan” (SWMPP) which has been created to provide guidance and instruction for compliance with Federal and State regulations. The program includes Public Education, Public Involvement, Illicit Discharge Detection and Elimination, Construction Site Management, Post-Construction Site Management, and Pollution Prevention/Good Housekeeping Practices.

The ultimate goal in implementing the plan is to decrease discharge of pollutants to the maximum extent possible and to protect the State waters in compliance with requirements of the Federal and State regulations.

St Vrain Valley School District is committed to practicing sound stormwater management practices and to observance and adherence to all Local, State and Federal stormwater rules and regulations.

Stormwater Concern or Illicit Discharge Report

Please complete the [Public Concern Form](#) and submit to:
