

## Gifted Education

The Board of Education is dedicated to providing comprehensive programming for the identification and education of gifted students. Gifted students are those students between the ages of four (4) and 21 whose abilities, talents, and potential for accomplishment are so exceptional or developmentally advanced that they require special provisions to meet their educational programming needs. The Board believes that a quality instructional program that differentiates curriculum and instruction is essential so all students can learn and grow at their level of potential.

To the extent resources are available for this purpose, the superintendent or designee shall develop and implement programming designed to meet the particular educational needs of gifted students that:

- Encourages acceleration and enrichment beyond the basic curriculum,
- Offers a differentiated curriculum that includes higher cognitive concepts and processes,
- Uses instructional strategies that accommodate the learning styles of the gifted, such as curriculum compacting, independent study and learning contracts, etc.,
- Includes a variety of placement options for delivering instruction and content extensions and which support like-ability grouping of gifted students,
- Fosters the individual growth of each student by linking programming to identified academic and effective needs of students,
- Supports students in the attainment of the district's academic standards,
- Assists students with pre-collegiate and/or pre-advanced placement programs, and
- Provides guidance support systems, including identifying post-secondary options.

The programming shall include early identification of gifted students who are at least five (5) years of age and may include the early identification of four (4) and five (5) year old highly advanced gifted students. The programming shall also include ongoing professional development of staff that administer, supervise or teach in such programs. The programs will be regularly evaluated.

The superintendent or designee shall submit to the Colorado Department of Education a program plan to identify and serve gifted students and may submit a program plan to serve four (4) and five (5) year old highly advanced gifted students. The program plan shall contain elements specified by applicable State Board of Education rules so the district [or administrative unit] will be eligible for state funding for these students.

Except as otherwise required by law, the superintendent or designee shall have the final determination regarding placement of students in district programs for the gifted.
