

Student Responsible Use of the Internet and Electronic Communications Guidelines

General Information

The smooth operation of the district's network relies upon users adhering to established standards of proper conduct. In order to be granted access to the district's network, a user must adhere to the provisions of the district's policies and regulations governing the use of the network. Compliance with these policies is required. In general, this requires efficient, ethical, and legal utilization of the district network. If a student violates district network policies, regulations, procedures or guidelines, access to the district network may be denied and other legal or disciplinary action may be taken. The district will cooperate fully with local, state, or federal officials in any investigation concerning or relating to misuse of the district network. The district network is the property of the district and its use is a privilege, not a right. Students enrolled in the district will be granted access to the district network.
